03 Levels to Mastery over App & Web Development

App and Web DEVELOPMENT

Whether it is creating attractive websites or cool applications, our App and Web Development course has got you covered. Even if you have no or little experience, this course is a great boost towards moving ahead on your path of coding.

The course starts from basic awareness of web development through CSS and HTML further moving towards app development and finally to imbining JavaScript into your websites and applications to make them more dynamic and attractive. It includes instrumental elements of web designing like text styling, colours and typography.

This exclusive level based, easy to grasp and detailed App and Web Development course is the perfect go-to solution if you want to master the art of coding.

Codevidhya's App & Web Development course - the stepping stone to your coding journey!

Level 01 **BEGINNER**

Enter the World of **APP AND WEB** Development

Learning Outcome

- Your First Webpage
- Your First App

Course Duration
08 Hours

Session
01 - 08

Session

Curriculum

Outcome

01

Overview of Web and
App Development

- Awareness on Website Development
- Awareness on App Inventor Interface and App Development

02

Code Blocks

- Utilizing Code Blocks
- Hello World App

03

Button and Canvas Properties

- Draw on Android Screen
- Digital Doodle App

04

Project : Pet on My Kitty

- Design and Code

05

Web Development Technologies

- Working with HTML
- Heading and Paragraph Tag
- Hyperlinks

06

HTML Properties

- Ordered List
- Unordered List
- List Properties
- Image Tag

07

CSS Properties

- Types of CSS
- CSS Selectors
- Box Model

08

Project : School Webpage

- Design and Code

Skill Benefits

- Creative Thinking
- Logical Thinking

Level 02

INTERMEDIATE

MASTER

App Development

Course Duration
32 Hours

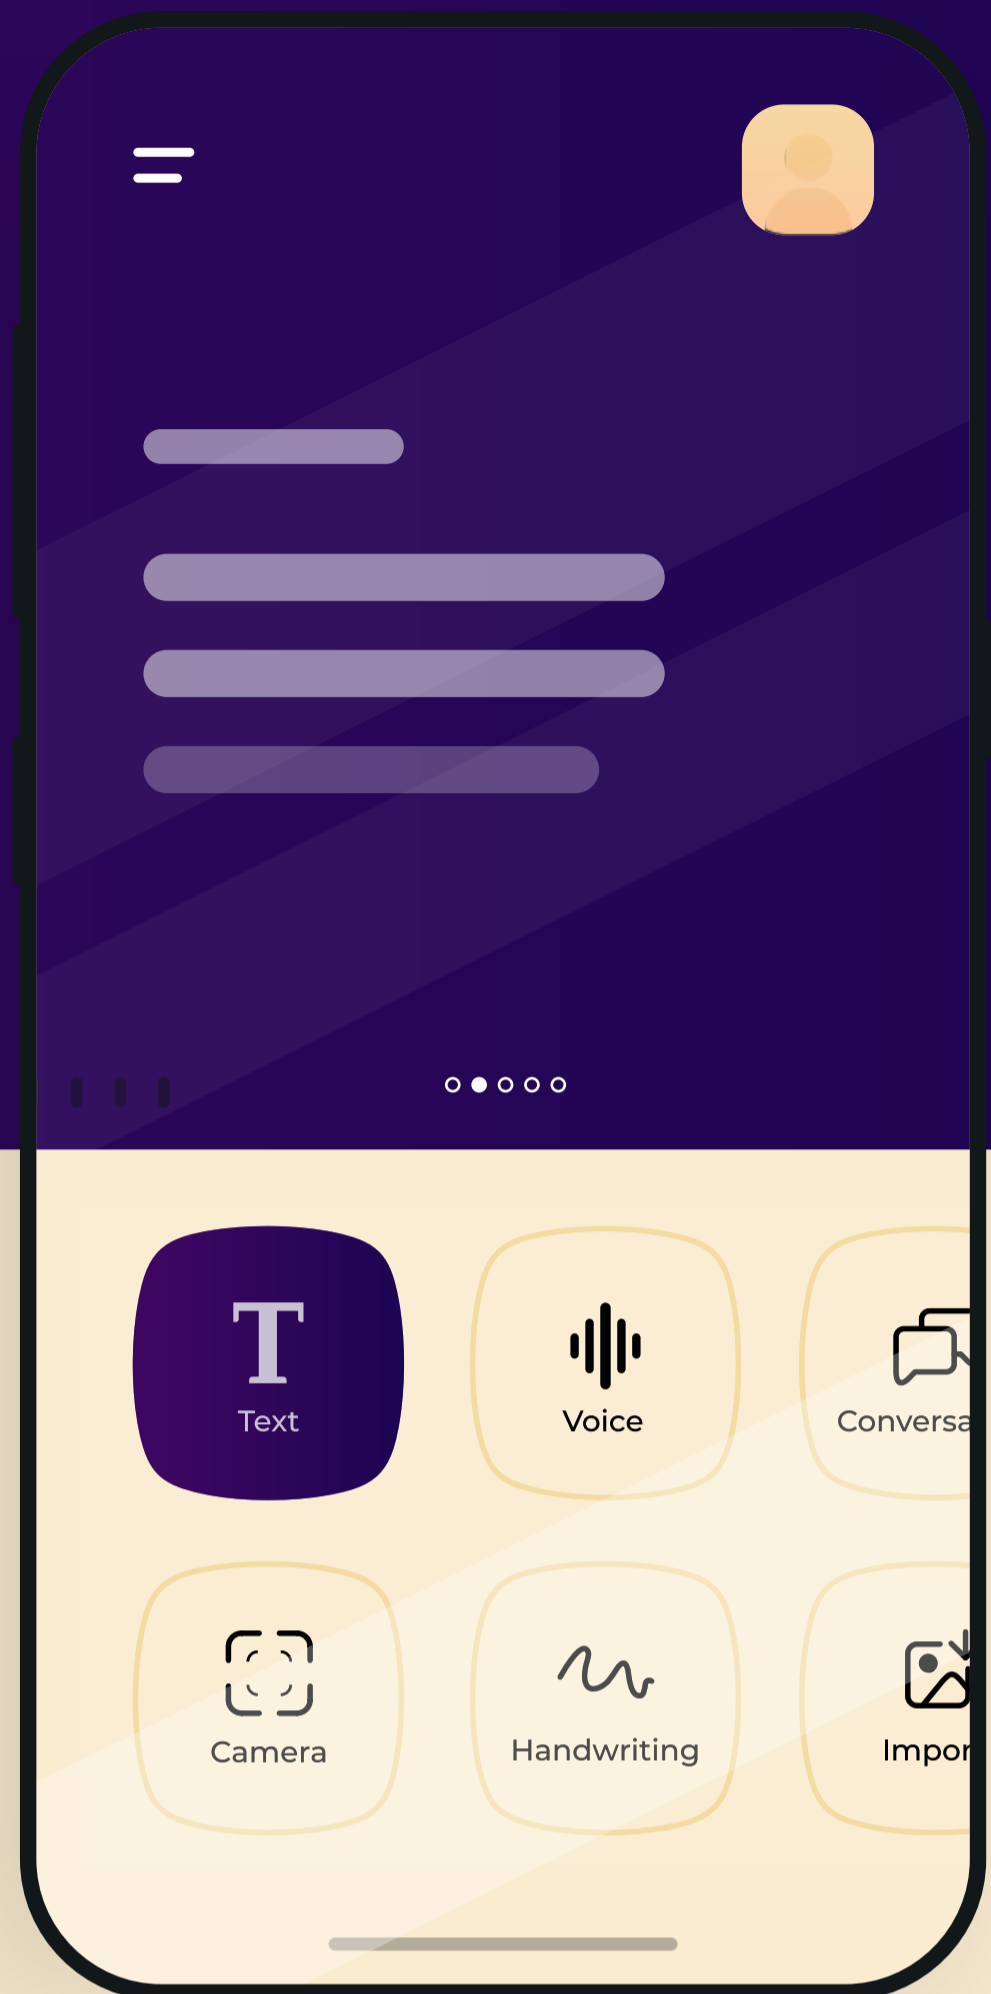

Session
09 - 40

Learning Outcome

- Your Own Custom App

Session

Curriculum

Outcome

09

App Inventor Overview

- Overview of App Inventor Interface
- Overview of Code Blocks

10

Maths Block and its Application

- Notifier Component
- Maths Project

11

Boolean, Logic and Conditionals Operation

- Logic Code Block
- Mutator
- if-then-else Conditionals

12

Variables and List

- Variable Declaration
- List Creation
- While-do Loop

13

Loops : For loop and While loop

- Looping through List
- Looping Project

14

Project : Maths Blaster

$$\frac{\sqrt{x^2 - y^2}}{z + x}$$

- Working with Lists of Dynamic (changing) Data.
- Coding Repeat Blocks (Iteration)
- Generating Random Numbers

15

16

Project : Piano App

- Start and Stop Music
- Play Multiple Instruments
- Design and Code

17

18

Alarm Clock and Time picker Component

- Setting Timer for Alarm
- Design Dialog Display
- Usage of Time picker

19

Sound and Clock Components

- Playing Sound File
- Alarm Clock App Design

20

Mole Mash Game

- Adding Canvas, Ball, and Image Sprites

21

- Animate Objects through User Interaction

22

Find My Gold Game

23

- Use of Accelerometer Sensor Component
- Understanding of Notifier Component
- Use of Conditional Programs

24

File Component and Notebook App

25

- Notes Input by User
- Saving File in the Android Devices
- Understanding Android Storage Structure

26

Tour Guide Game

27

- Design and Code Location Based App
- TinyDB Component to Store Data
- Uses of Multiple Screen and Value Passing

28

Two Button App

29

- Multiplayer Game
- CloudDB Component to Store Data

30

Sketch and Guess App

- CloudDB Component
- Boolean Operators
- Data Manipulation

31

Talking Tom App

Design and Code

33

34

Shopping List App

• Design and Code

35

36

Fitness App

• Design and Code

40

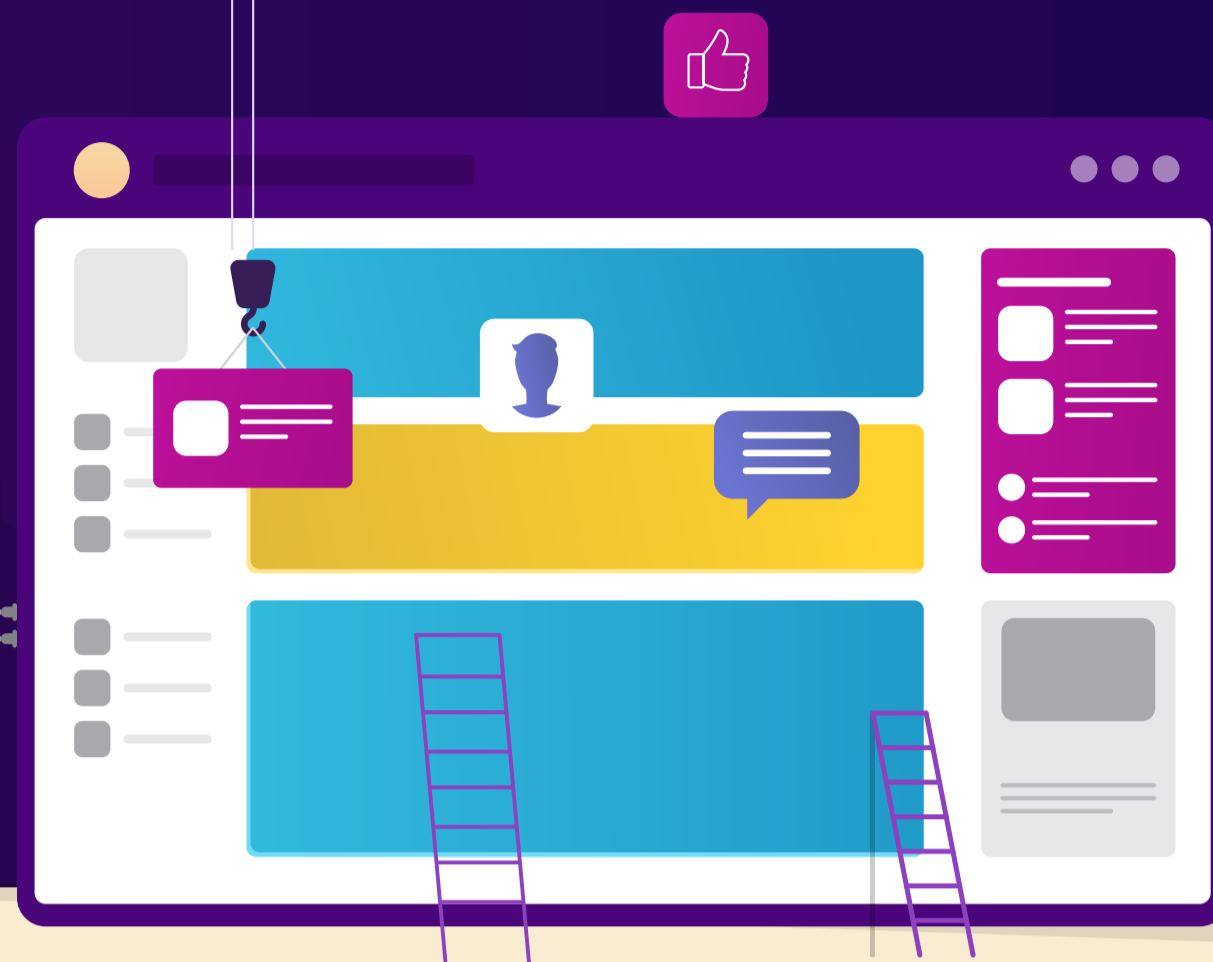

Skill Benefits

- Enhanced Problem Solving Skills
- Increased Creativity
- Improved Computational Skills

Level 03 **ADVANCED**

ADVANCED Web Development

Learning Outcome

- Complete understanding of Web development
- Ability to use logic loops and conditionals to develop cool Projects.
- Developing website for Schools, COVID awareness, e-Commerce Business, etc.

Course Duration
40 Hours

Session
41 - 80

Session

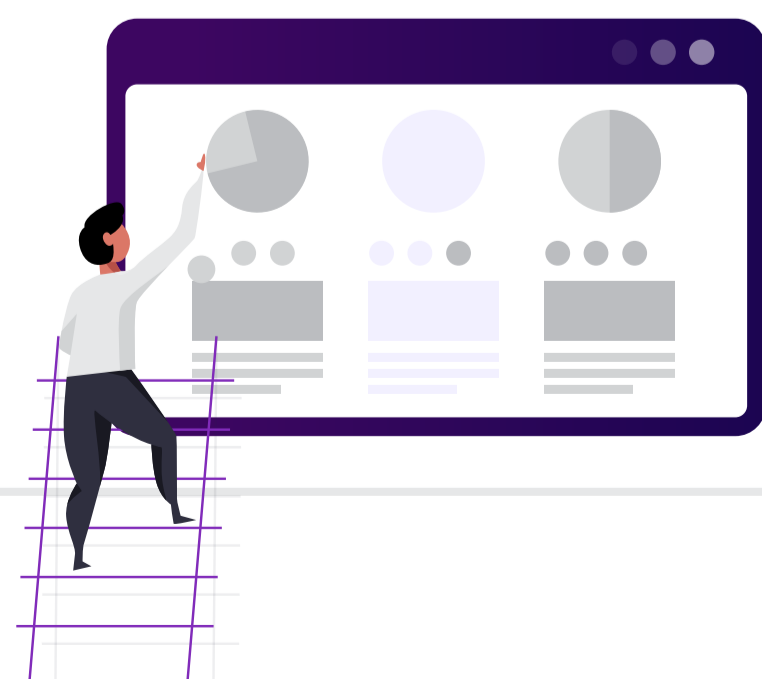

Curriculum

Outcome

41

Introduction to
HTML

- Introduction to Web Development
- Types of Elements
- HTML Comments
- Versions of HTML
- Doctype Declaration

42

Some Common HTML Elements

- Headings, Paragraphs and Spans
- HTML Attributes
- Links
- Images

43

Lists

- Inline vs Block-level Elements Lists
- Ordered and Unordered List
- Numbering and Bullet Style for Lists

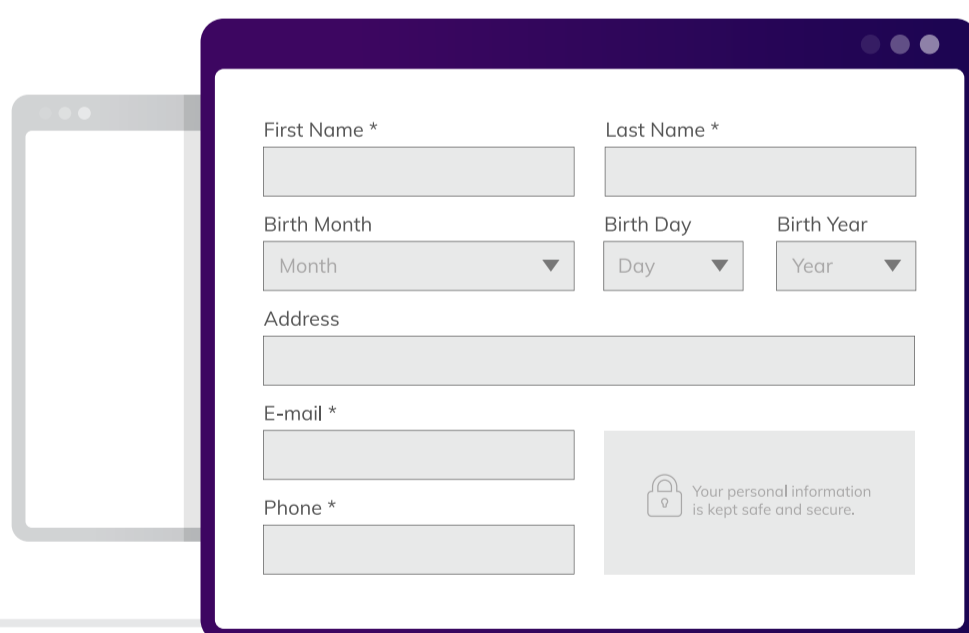

44

HTML Tables

- Table Tags and Width
- Rows and Column
- Adding Data to Table

45

Forms

- Forms
- Form Elements – Text, Number, E-mail, Password
- Placeholders
- Project : Read up on all types of Form Elements

46

Introduction to CSS

- Introduction to CSS Syntax
- Internal and External CSS
- Some Common CSS Properties

47

CSS Selectors and Key Properties

- Types of Selectors
 - Select by Class, Id and Grouping
 - Color Property, Font Property
-

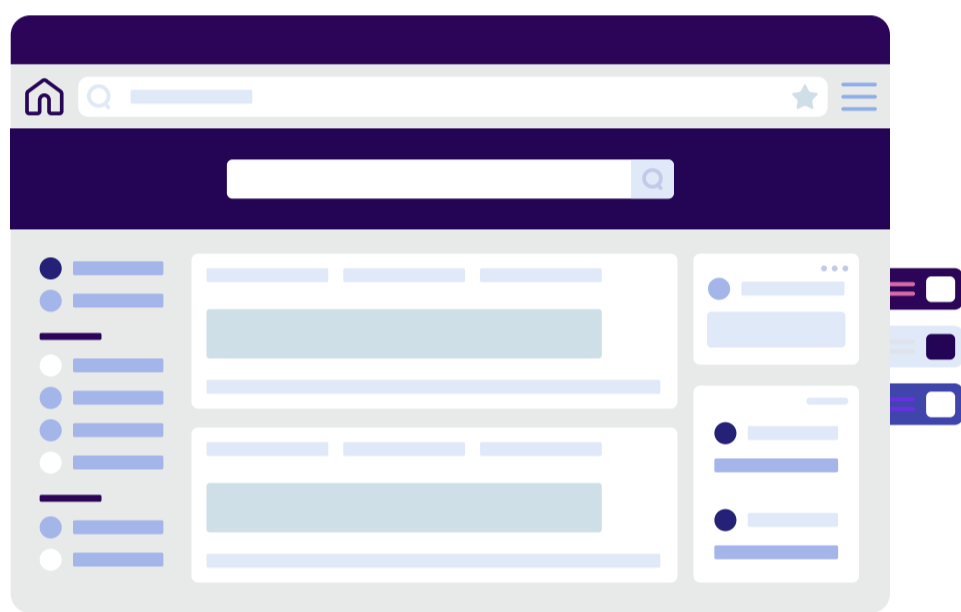

48

Project

- Form Design
-

49

Styling Text

- Text Styling
 - Colours – Names and Hexadecimal Colour Codes
 - Sizes – Pixels and cm
 - Line Spacing
 - Project : Create a Book Page
-

50

Background Color and Images

- Styling Links
 - Pseudo-Classes
 - Background Colours
 - Background Images
 - Background Image Properties
 - Project : Create Web Page About Your Favourite Game or Movie
-

51

CSS Box Model

- Box Model – Paddings, Margins, Dimensions
- Displaying Property
- Positioning

52

Project

- Designing Webpage Using Flexbox
-

53

CSS Tables

- Decorating a Table
 - Adjusting Columns and Rows
-

54

Psedo Class and Element

- CSS Commands on Psedo Classes
 - Display and Max Width Properties
-

55

CSS Position, Float, Align

- Adjusting the Position of Elements Using CSS Commands
-

56

Project - School Website

- Design and Code

58

58

59

Introduction to JavaScript

- Introduction to JavaScript
- Adding JavaScript into a Web Page
- Writing JavaScript Statements
- Printing Result on the Page using JavaScript

60

Variables and Datatypes

- Variables and Data types
 - Numbers, Strings, Booleans, Arrays, Null and Undefined
-

61

Operators and Conditionals

- Operators
 - Control Flow
 - Conditionals : if else
 - Do while loop
-

62

Control Flow and Loops

- For loop
 - Switch-Case
-

63

Functions

- Functions – Parameters, Arguments, Return
 - Anonymous Functions
 - Project : Creating a Voting Eligibility Checker Program using JavaScript
-

64

Project : Calculator

- Design and Code

65

66

JS; String and Array Methods

- Length, Index and Search
- Uppercase and Lowercase

- Indexing and Trim Command
- Pop and Push Command
- Indexing and Slice Command

67

JS: Maths, Random and Boolean

- round, pow, min, max Commands
- Boolean Commands

68

DOM : Intro and Methods

- Objects
- DOM – Document Object Model
- DOM Properties
- Finding Elements
- innerHTML, console.log
- Project : Creating an Interactive Web Page

69

DOM: Event Listeners, Navigation Nodes, nodes List

- Exploring how Nodes Function, How it can be used to add to Elements

70

Project : To do list

- Design and Code

71

Project : Covid Awareness Website

- Design and Code

74

75

Project : E-commerce Website

- Design and Code

79

80

Hosting Your Website

- Domain and Hosting Rules
- My Website, SEO Rules and Beyond

Skill Benefits

- Enhanced Logical Thinking
- Increased Cognitive Skills
- Boosted Abstract Thinking
- Improved Presentation Skills
